

Azure OpenAI Service Hack-to-Learn

Build apps with large-scale AI models

Hack-to-Learn

Duration: 1-2 days | Focus Area: Proof of Value | Difficulty: Level 300/400

Overview

An interactive learning experience to utilize pre-built Azure OpenAI Service solution accelerators that can turn your MVPs into production-ready projects. We will give you the opportunity to hack on real-world Azure Open AI & Analytics use cases specific to financial services. Our expert cloud architects and industry specialists will help you with the building process, step-by-step and you will work together in a team setting to bring a business outcome with prototype solution.

Objectives

- Building at Scale Generative AI Applications
- Retrieval Augmented Generation
- Prompt Engineering
- User Feedback/Human in the Loop/Citation

Audience

- Data Scientists
- AI Engineers
- Developers

Prerequisites:

- Enabled Azure OpenAI Service in Customer Subscription
- Completed Azure OpenAI Service Workshop
- Identified a use case
